

SENIOR ARCHITECT

Role Overview

Baumschlager Eberle Hanoi, Vietnam is seeking a full-time well-rounded Senior Architect with strong management and design skills who can steer projects or part of a project through most work stages while leading. This position will report to Studio Manager.

Responsibilities

- Lead and manage Interior Design team and implement directives from Studio Manager in providing services per scope, budget, and schedule.
- Act as the lead on given elements of a project, managing simple team in-house and coordinating external teams to meet requirements on time and budget.
- Maintain and protect the integrity of a design concept throughout development.
- Implement sustainability strategies.
- Develop project briefs effectively using initiative to analyze options and prioritize alternatives.
- Understand and apply all legislation to a project.
- Conduct quality assurance reviews of working drawings.
- Organize sets of presentation and construction documents.
- Develop technical detailing including innovative conditions.
- Respond effectively to construction processes and logistics.
- Contribute to personnel development and staff appraisals.
- Interface with clients and deliver design presentations to clients.

Requirements

- **08+ years of experience in architecture.**
 - Master's degree in Architecture.
 - Must fluent in English and professionally work in English.
 - Prior experience in international project.
 - Be able to quickly learn and integrate into Vietnamese culture and the workflow of the company. Willingness to continuously learn and stay updated on regulations, especially Vietnam building and fire codes.
 - Expertise in AutoCAD and 3D modeling software (Revit/Rhino/3dsmax); knowledge of 3D modeling and rendering software are preferred but not required.
 - Must have a background working on projects during all phases of development, from concept design through completion of construction.
 - Effective communicator when describing complex ideas.
 - Proficient in project planning, design, and execution, and project management.
 - Knowledgeable in building standards and construction detailing.
- Enthusiasm for working on multi-disciplinary and highly collaborative teams.

Benefits

This position offers biannual performance reviews and medical insurance.
